Regional Office: Malaysia | Shanghai | Hong Kong

We offer a wide spectrum of innovative safety solutions for various industries.

We started from our humble beginnings in 1989 to offer our customers with a one stop solution to their industrial automation needs. We have now accumulated close to 30 years in solid industry knowledge and have built an extensive distribution network for clients that include small, medium sized companies to international MNCs.

30+ years in industry experience let us forged strong relationships with our satisfied customers.

Regional sole-distributor of various well-known European manufacturers, some since 1989.

Extensive distribution network to offer our clients one stop solution.

Our motto is to provide strong dedication to exceptional and efficient services.

We are dedicated to offer prompt and unrivaled customer support. Customer satisfaction is always the goal for us.

We always pride ourselves to exceed customers' expectations.

We have honed our expertise in product knowledge and applications working with clients over the years.

Factory trained staffs continue to offer effective solutions specific to our customers' requirements.

Strong understanding of efficient product sourcing for maximum value added.

Your Partner in Safety & Automation

We are your single-source provider of quality safety applications and solutions - whether they are sensors, switches, light curtains, safety edges, mats or bumpers. We know safety and we provide our clients unmatched quality in a wide range of safety-related components and systems.

BM SAFETY
INNOVATIVE SAFETY TECHNOLOGY

MAYSER Safety Products

Mayser GmbH is Europe's leading manufacturer of tactile sensor for safety technology. Products by Mayser include Safety Edges, Mats, Bumper or non contact solutions like ultrasonic Safety Sensors. Application for these products include Automotive, Buses and trains, stage technology, mechanical engineering, Medical technology, Furniture technology, Doors, gates & windows etc

LEINE & LINDE Encoder

Leine & Linde is a leading manufacturer of encoders, sensors, system electronics for industrial applications. We offer customization to ensure our encoder and sensor solutions suits the demanding environments. our product hold advanced measuring systems for accurate feedback of speed, position or strain. These products are primarily used for positioning or velocity feedback. Leine & Linde products are renowned to be sturdy, reliable and strong capabilities. Our solutions often become the natural choice for heavy-duty operations located in harsh environments.

EUCHNER Safety Switch

As specialists in industrial safety engineering, Euchner develop and manufacture products and solutions tailored to the requirements of customers from a wide range of sectors. Using Euchner guards on machines and installations helps to minimize hazards and risks, which in turn protects people and processes.

WICK Sensor

Wick Sensor is one of the leading sensor manufacturer in China that are built and designed in accordance with strict international norms and complies with CE marks & ROHS direction. Wick's sensors and devices are especially resistant to extreme environmental conditions

WENGLOR Photoelectric Sensors

Wenglor sensoric is your competent partner for photoelectric sensors. Our diverse range of innovative products we carry provides solutions for a multitude of complex automation application. Our photoelectric sensors are able to detect or count objects without physical contact, measure distance to the highest accuracy and identify colors in terms of brightness or luminescence.

ROUNDSS Rotary Encoders

ROUNDSS is one of the leading producers of rotary encoders in China. They not only specialized in rotary encoder, but also in draw wire displacement sensors, CNC spindle encoders, elevator encoder, textile encoders, as well as manual Pulse Generator & Handwheel.

AECO

AECO Sensors built and designed position sensors, inductive sensors, capacitive sensors, photoelectric sensors, fiber optic sensors. In addition, these sensors are customizable to meet the different and unique technological and dimensional requirements in the most varied sensor applications in the automation sector.

ASTECH Colour Sensor

The CROMLAVIEW® family are comprised of color sensors that processes colors in a perceptually (i.e. according to human perception to colour). These colour sensors are suitable for industrial applications that demands for technology of a high standard to ensure reliability during operation of the entire life cycle. Our sensors protect the operation from temperature drift as well.

FEAS Power Supply

FEAS provide full range power supplies. Linear regulated, unregulated, switch mode, DC-UPS etc.

MECHAN CONTROL Magnetic Safety Switches

Easy to install and maintain, the Magnasafe switches are fully encapsulated non-contact. Mechan prides their switches to be able to withstand harsh and wet conditions. Magnasafe switches comes in a wide variety of sizes and contact configuration, enabling the Magnasafe switches to be suitable for machine guarding applications where guard locking is not required.

INXPECT LBKSystem

The LBK system is an active protection radar system that monitors the dangerous areas of machinery. It performs two safety functions:

- Detection Function: it displaces the machinery into a safe condition when someone enters the dangerous areas.
- Restart Function: it inhibits the restart of the machinery if there are operators in the dangerous zones.

HOHNER Encoder & Inclinometer

Hohner Automations have a vast of shaft encoders, from miniature encodes of 24mm diameter till heavy duty models of 90mm.

They also have INCLINOMETERS in either CANopen or Analog output.
